INTRODUCTION

The 13th Annual Meeting of the [Global Research Council](#) (GRC) took place in Riyadh, Saudi Arabia, from May 18 to 22, 2025. The Meeting was co-hosted by the Research, Development, and Innovation Authority (RDIA), King Abdulaziz City for Science and Technology (KACST) of Saudi Arabia, and the Scientific and Technological Research Institution of Turkey (TÜBİTAK), aiming to bring together heads of research funding agencies worldwide to foster exchange and share good practices.

This report is intended to inform GRC Participants about the key milestones of the organization of the 13th GRC Annual Meeting 2025 in Riyadh, specifically registration, program, and the Statement of Principles, to enhance the delivery of future GRC annual meetings. Furthermore, the report concludes with survey findings that highlight a remarkably high level of participant satisfaction, affirming both the success of the 13th Annual Meeting and the strength of its governance framework.

REGISTERED PARTICIPATIONS

More than 200 participants, representing 55 research councils from 51 countries, attended the meeting and actively contributed to dynamic discussions throughout the Annual Meeting program. These attendance figures underscore the Global Research Council's strong appeal and global significance. Figures 1 to 4 illustrate, respectively:

1. The distribution of registered participants by GRC regions,
2. The breakdown of participants by roles and functions,
3. The distribution of registered Heads of Research Councils (HORCs) by GRC regions, and
4. The gender distribution of registered HORCs.

Annex 1 provides a detailed list of the participating organizations, categorized by GRC region.

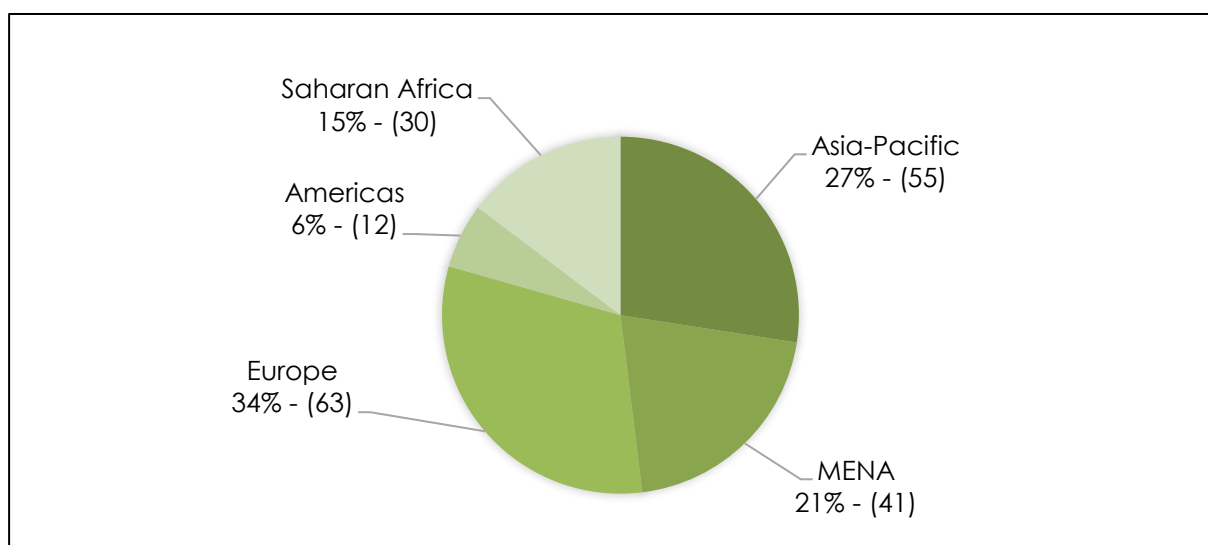

Figure (1). The distribution of registered participants by GRC regions

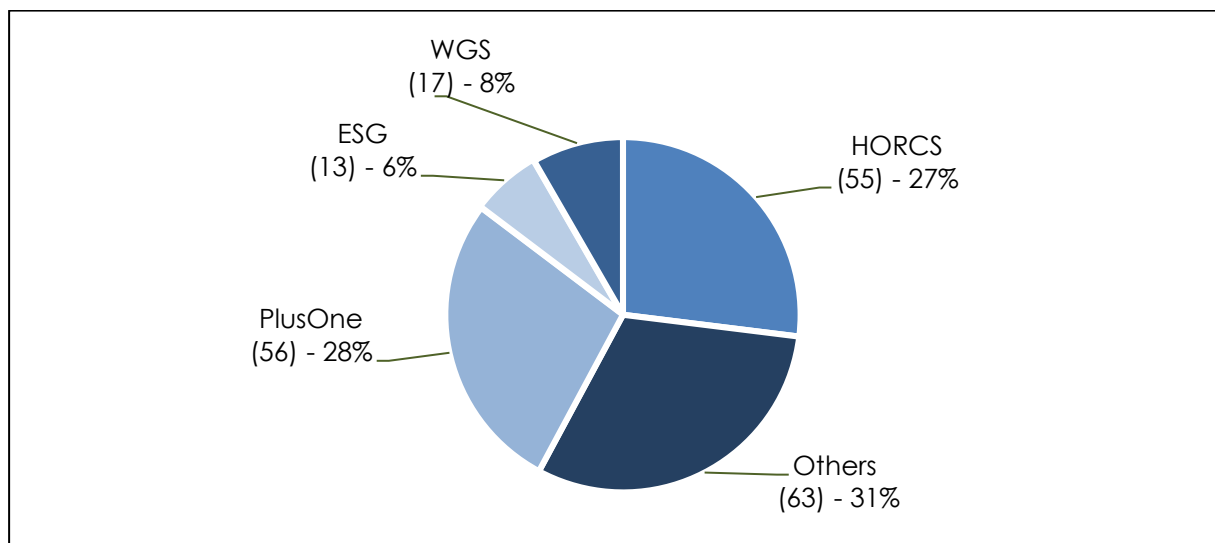

Figure 2: The breakdown of participants by roles and functions

Figure (3). The distribution of registered Heads of Research Councils (HORCs) by GRC regions

Figure (4): The gender distribution of registered HORCS

ANNUAL MEETING PROGRAM:

The 13th Annual Meeting of the Global Research Council (GRC) was organized around three key building blocks:

1. Pre-Meeting Activities
2. Main Program.
3. Technical and Cultural Visits.

1. Pre-Meeting Activities

This segment took place during (May 18–19, 2025), to accommodate the GRC governance and working group meetings, regional consultations, and side events, providing a platform for preparatory discussions and strategic alignment.

Six **side events** were organized and hosted by various participating organizations during the first two days of the Annual Meeting. These events focused on topics aligned with the current 2025 GRC thematic cycle, as well as emerging themes anticipated for the 2026 cycle. The side events provided valuable platforms for in-depth discussions, knowledge exchange, and collaborative exploration of key issues shaping the global research funding landscape. In addition to the six side events hosted by participating organizations, three additional side events were organized by the GRC Working Groups. These sessions aimed to update participants on the progress of each Working Group's mandate, highlight key challenges encountered, and outline the next steps in their respective work plans. Together, these side events enriched the Annual Meeting by fostering deeper engagement with ongoing GRC initiatives and strategic priorities (Annex 2).

Moreover, the **Collaboration and Neutrality Task Group (CNT)** held a dedicated town hall workshop on May 19, 2025. The session was designed to

inform participating Heads of Research Councils (HORCs) about the newly established CNT and its mandate. The CNT is tasked with developing a process to establish clearer guidelines on how the GRC can maintain its role as a neutral, trusted international forum—one where participating organizations can engage in open dialogue on shared research and science policy issues, grounded in impartiality, trust, and mutual respect. The town hall provided an opportunity for HORCs to exchange perspectives and offer insights on how best to fulfill the CNT's mandate, ensuring that the GRC continues to serve as a collaborative and inclusive platform.

2. Main Program:

The main program of the 13th Annual Meeting took place during May 20–21, 2025, it was organized around four core sessions, in addition to the Opening Ceremony. These sessions addressed the two thematic topics of the 2025 GRC Annual Meeting:

- Research Management in the Era of AI
- Working Together in Co-Creation to Address Global Challenges

Each of the first two sessions introduced one of the above topics through a keynote address delivered by a globally recognized expert. Following the keynote, participants engaged in five parallel breakout groups, each exploring a specific dimension of the topic in greater depth. Each session concluded with the endorsement of a Statement of Principle (SOP), reflecting the collective insights and commitments of the participants.

The third and fourth sessions focused on internal GRC matters. The third session provided updates on ongoing GRC activities, while the fourth session looked ahead to future initiatives, including the announcement of the 2026 Annual Meeting co-hosts and thematic topics.

Further details on the main program sessions are provided in Annex 2.

3. Technical and Cultural Visits

The final day (May 22, 2025) offered participants the opportunity to engage in curated technical and cultural visits, fostering a deeper understanding and appreciation of the host country's research and innovation landscape.

STATEMENT OF PRINCIPLES (SOPS):

1. Research Management in the Era of Artificial Intelligence (AI) ([link](#)).

- This Statement of Principles outlines a comprehensive framework for integrating AI into research funding and management processes. It underscores the pivotal role of Research funding agencies in shaping research through funding, peer review, and policy-making. In addition

to the central role of AI in enhancing these processes, if governed responsibly. It highlights the recommended core principles for the potential applications of AI in Research Management, including:

- AI Adoption: AI offers efficiency and innovation in research workflows, and Adoption must be regulated, governed, and aligned with best practices.
 - Decision Making: Final decisions must remain human-led, and AI should support, not replace, human judgment.
 - Bridging the Digital Divide: Ensure equitable access to AI tools and infrastructure, and promote open-source AI, inclusive training, and connectivity in under-resourced regions.
 - International Collaboration: Share best practices, resources, and expertise globally, and Support capacity-building in regions with limited AI capabilities.
 - Bias and Fairness: Train AI on diverse datasets to avoid marginalizing underrepresented communities, address linguistic and bibliometric biases, and ensure AI aligns with impartial review policies.
 - Transparency and Accountability: clearly define when, where, and by whom AI is used, and ensure explainability, validation, and reporting of AI outputs.
 - Privacy, Data Security, and Intellectual Property: protect sensitive data and proprietary ideas, require author consent for data use and AI training, and prevent misuse of generative AI on submitted proposals.
 - AI Literacy: Train users on AI systems and their limitations, and promote compliance and responsible use.
 - Sustainable Development: AI use should not harm the environment, and encourage energy-efficient AI models.
- Also, it puts forward some Recommended Actions to enhance the implementation of AI in research management, including:
- Promote open-source AI and support low-resource AI research.
 - Maintaining public trust through transparency in AI training and data handling.
 - Encourage the publishing of public training data with privacy safeguards.
 - Conduct continuous evaluation of AI systems and publish performance metrics.
 - Consider the formation of a GRC working group on AI, led by experienced participants.

2. Co-Creation for Addressing Global Challenges [\(link\)](#)

- This Statement of Principles outlines a strategic framework for integrating co-creation into research and innovation systems to address complex global challenges, including climate change, pandemics, and energy transitions.
- It defines co-creation as the collaborative generation of value by engaging diverse stakeholders, academia, industry, policymakers, and civil society throughout all stages of research and development.
- It highlights the key principles of integration of co-creation in the research and innovation ecosystem as follows:
 - Inclusion and Equity: Empower underrepresented voices and ensure equitable access to resources.
 - Stakeholder Engagement: Foster trust and long-term impact through active participation and capacity building.
 - Interdisciplinary Collaboration: Promote cross-sectoral and transdisciplinary approaches to problem-solving.
 - Citizen Science: Enhance transparency and societal relevance through public involvement.
 - Emerging Technologies: Leverage AI, blockchain, and IoT ethically to support collaboration.
 - Sustainability: Align initiatives with environmental, social, and economic goals.
 - Governance: Establish robust structures for accountability, resource allocation, and stakeholder rights.
- This SOPS puts forward some recommended implementation strategies:
 - Develop inclusive co-creation platforms with multilingual and virtual collaboration features.
 - Introduce adaptive funding mechanisms for multi-stakeholder partnerships.
 - Advocate for supportive policies and regulatory frameworks.
 - Strengthen global collaboration through joint funding and shared infrastructure.
 - Apply comprehensive monitoring and evaluation frameworks.

SATISFACTION LEVEL OF PARTICIPANTS:

As part of the broader initiative to implement governance standards for event management, a specialized survey was conducted to evaluate the satisfaction levels of attendees and participants at the 13th Annual Meeting of the Global Research Councils. This assessment aimed to capture a comprehensive understanding of the overall experience by soliciting feedback across several key dimensions:

- **Quality of Planning and Organization:** Effectiveness of logistical arrangements and event coordination.

- **Clarity of Presented Content:** Accessibility and relevance of materials shared during sessions.
- **Efficiency of Services and Facilities:** Responsiveness, professionalism, and adequacy of support services.
- **Venue Suitability:** Appropriateness of the location in terms of accessibility, comfort, and functionality.
- **Overall Experience:** General impressions and perceived value of attending the event.

The survey results were highly encouraging, indicating a strong level of satisfaction among participants.

Overall satisfaction reached approximately **94.6%**, with particularly high ratings in key areas:

- **98.2%** for the quality of scientific content and the diversity of speakers and topics
- **96.3%** for logistical arrangements
- **85.5%** for the clarity of pre-event communications, including invitations, agendas, and instructions

These findings underscore the effectiveness of the event's planning and execution, and provide valuable insights for future enhancements.

How satisfied are you with the overall organization of the event

55 responses

How would you rate the quality of the scientific content presented

55 responses

How satisfied are you with the diversity of speakers and topics

55 responses

How would you rate the logistical services (registration, hospitality, transportation, venue facilities)

54 responses

Were the pre-event communications (invitation, agenda, instructions) clear and sufficient?

55 responses

VISUAL LIBRARY DOCUMENTING MEMORABLE MOMENTS

We are also delighted to share with you a visual library documenting memorable moments we shared during the the 13th GRC Annual Meeting through the attached link.
