Our vision is that GRC participant organisations and the organisations they fund embed approaches to assessment that incentivise and reward the diverse attributes of research excellence in support of a better, healthier research culture that supports rigorous research undertaken to the highest standards.

Our aim is to help position the GRC as a leading voice on the promotion and implementation of RRA in the international research and innovation system to help build a diverse and inclusive research culture. Through the GRC we will jointly support the adoption of RRA globally by developing a collective understanding of RRA, learning through collaboration, as well as sharing guidance and best practice.

What we have delivered
- The full report of the Dimensions of RRA can be downloaded from our website, please scan QR code to access our website.
- We have worked towards a shared understanding and goal for RRA within GRC participant organisations. The Dimensions of RRA can be downloaded here [smart hyperlink or QR].

What we will do next
- We have launched a 2024 survey on RRA of GRC participant organisations in collaboration with the Research on Research Institute. This will help us to understand the current state of play and reflect on changes in RRA from 2020 (when the last survey was conducted). Your organisation will be invited to participate in the survey which will close in August 2024.

Dimensions of Responsible Research Assessment

Guiding Principles
1. Responsible research involves a shared understanding and goal for RRA within GRC participant organisations.
2. Responsible approaches to research assessment are intended to support the adoption of RRA globally.
3. Responsible emphasis on equity, diversity, and inclusion in research.
4. Responsible respondents to the effects of global challenges and emergencies on research.
5. Responsible responses to the effects of global development priorities on research assessment.
6. Responsible responses to the effects of global development priorities on research assessment.
7. Responsible responses to the effects of global development priorities on research assessment.
8. Responsible responses to the effects of global development priorities on research assessment.
9. Responsible responses to the effects of global development priorities on research assessment.
10. Responsible responses to the effects of global development priorities on research assessment.

Processes and Methodology
- Share case studies in line with the Dimensions of RRA:
- Share how funds have implemented and embedded RRA.
- Extend the knowledge base where gaps and barriers persist.
- Develop a self-assessment tool and supporting roadmap for funders.

Co-Chairs
- Mohammad Al-Shamsi
- Alistair Overington

Working Group Vision
- Shared understanding
- Shared practice
- Coordinated action
- Continued support

Working Group Aim
- We have launched a 2024 survey on RRA of GRC participant organisations in collaboration with the Research on Research Institute. This will help us to understand the current state of play and reflect on changes in RRA from 2020 (when the last survey was conducted). Your organisation will be invited to participate in the survey which will close in August 2024.

What we will do next
- Analyse and produce a working paper on the results of the 2024 GRC RRA survey.
